Full Stack Developer / Automation Engineer

Possess broad range of technical expertise that spans automation, software development, and full-stack technologies. Proficient in crafting innovative, user-centric solutions that enhance efficiency, engagement, and overall user experience. Excel at combining creative problem-solving with analytical precision, delivering impactful and intuitive technology interfaces across the full spectrum of development. Demonstrated commitment to transforming complex challenges into streamlined, user-friendly systems. Leverage diverse skills to develop comprehensive, end-to-end solutions that meet and exceed user needs and expectations.

Front End / Back End Development | Continuous Learning | Critical Thinking | Creativity | Time Management | etc.

Technical Proficiency

Python | Cypress | Postman | Git/GitHub | JavaScript | Node.js | React | Vue.js | Express | Django | MongoDB | PostgreSQL
GraphQL | Apollo Client | Apollo Server | qTest | Azure DevOps | Jira | Scrum/Agile Methodology | LaunchDarkly | HTML
Cascading Style Sheets (CSS) | Sass | Adobe Illustrator | Adobe Photoshop | ETQ Quality Management System

Professional Experience

Humana, Inc., Louisville, KY
Automation Engineer   06/2023 - Present
DIGITAL ONBOARDING | Cypress, qTest
- Developed advanced Cypress test suites for Humana's Digital Onboarding, boosting test process efficiency and accuracy.
- Automated key user journeys, streamlining data collection and enhancing user experience and data integrity.
- Refined Cypress repo with ADO integration for enhanced test coverage and CI/CD alignment with app evolution.

Humana, Inc., Louisville, KY
Full Stack Engineer 2   01/2023 - 06/2023
DIGITAL BENEFITS | Vue.js, Node.js, Express, GraphQL, Apollo Server, Apollo Client
- Enhanced user experience with a tailored digital service, improving satisfaction and benefit usage.
- Boosted digital adoption with reusable Vue.js components, simplifying benefit access across MyHumana.
- Developed an intuitive platform, increasing member engagement and streamlining benefit understanding.

Humana, Inc., Louisville, KY
Junior Full Stack Engineer   01/2022 - 01/2023
DEBUT | Node.js, React, Express, SCSS, Jest, MongoDB
- Web application for Call Center Advocates to access and share benefit information with Humana members.
- Developed a plan comparison modal that increased application usage by 30%.
- Write tests using Jest and React Testing Library to maintain 80% repository coverage.

BEBOP | Node.js, Express, Marked.js
- Decoupled DEBUT backend for stand alone BEBOP API service.
- Integrated changes currently being made in DEBUT till fully decoupled.
- Used Marked.js to document BEBOP for external users to consume.

General Assembly, New York, NY
Software Engineering Immersive Fellow   04/2021 - 10/2021
- Built stable and maintainable codebases using React.
- Implemented a mobile-first approach to websites.
- Worked closely with User Experience designers and team members to meet goals and desired functionality.
- Created modular, responsive templates using modern CSS techniques and JavaScript libraries.
